

The Secret is Out - Spread the Word

The Cove exposes the slaughter of more than 20,000 dolphins and porpoises in Taiji, Japan every year, and how their meat, containing toxic levels of mercury, is being sold as food in Japan and other parts of Asia, often labeled as whale meat. The majority of the world is not aware this is happening as the Taiji cove is blocked off from the public. The focus of the Social Action Campaign for *The Cove* is to create worldwide awareness of this annual practice as well as the dangers of eating seafood contaminated with mercury and to pressure those in power to put an end to the slaughter.
